

SAMUEL R. BISHOP

OBJECTIVE

Seeking a position that allows me to utilize my experience in customer service, teamwork, organization, and leadership. I truly enjoy a remote collaborative environment and thrive off of delivering high quality applications that run efficiently.

QUALIFICATION

- Excellent Customer Service
- Energetic and motivated
- Works well as a team player
- HTML, CSS, JavaScript, JQuery
- Node, Express, Sequile, Sequelize
- MySQL, MongoDB, Mongoose

EXPERIENCE

My initial experience as a developer came while trying to tackle a simple automation project for my home. I was programming micro controllers before I really knew what programming was. It took me by surprise that I could learn, process and teach others how to do the same. I quickly realized that I wanted to code more, but I wanted to develop web applications. I started with learning HTML, CSS, and JavaScript fundamentals after work online. Since then, I've pursued a full stack web developer program at Michigan State University which I'm currently attending. We've completed multiple group projects and I've taken a leadership role in many of them.
